

Bridge to the Future

Tech Manage

Tech Manage corp. is a technology transfer company that promotes the practical application of university research results.

Our Mission

We provide opportunities for the creation of new industries by bridging information on advanced technologies from universities and other institutions to the most suitable companies and thereby devote to universities social contribution.

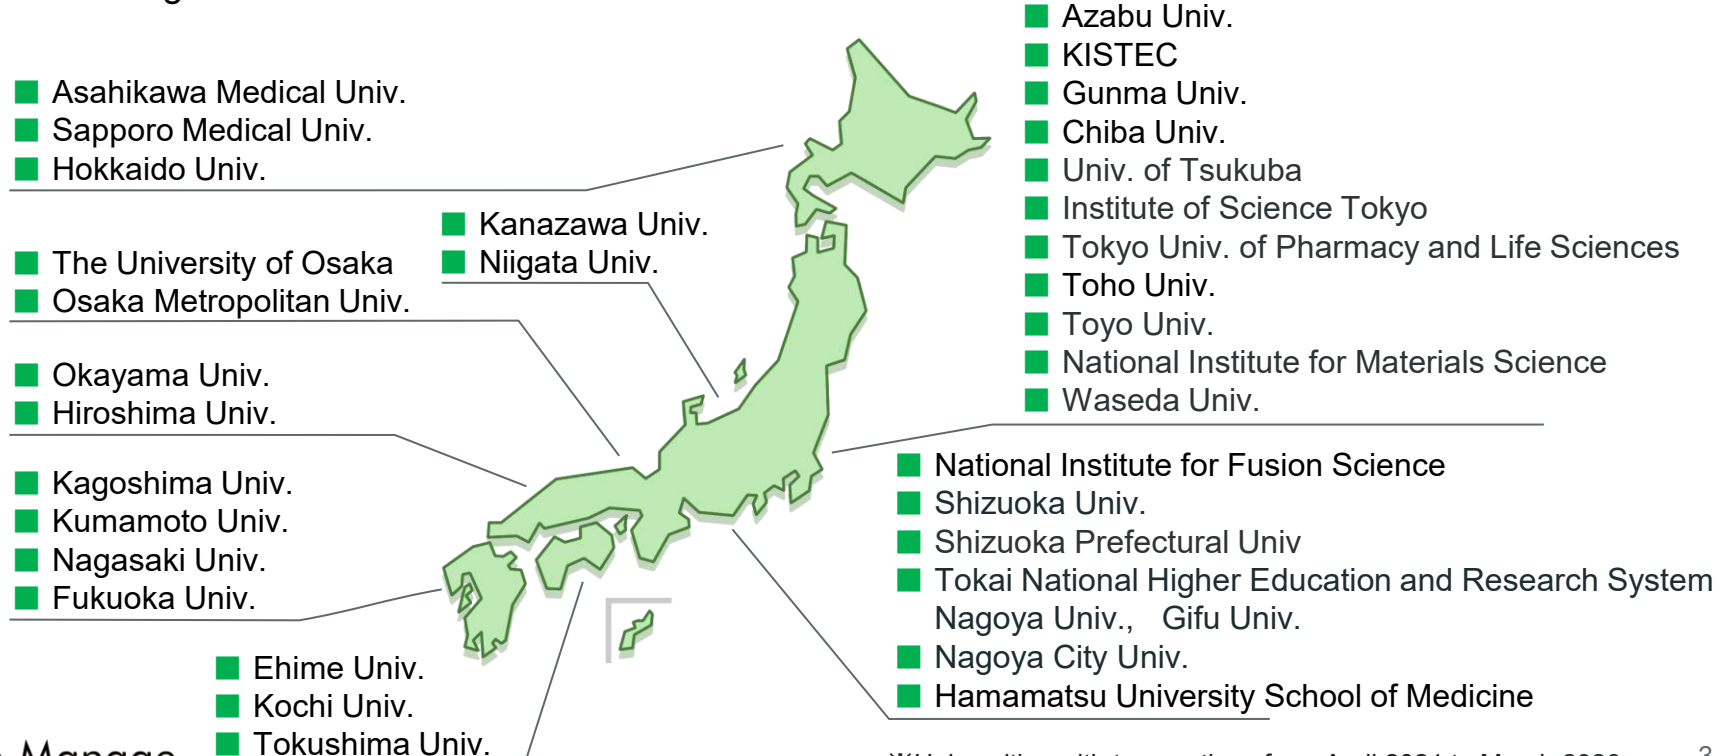

History

July, 1998 We started business as a new business development office of Recruit Co., Ltd.

April, 2012 We spun off from Recruit Co., Ltd. and founded Tech Manage Corp.

We handle the top rated research from Japanese universities and research institutions

We are not a TLO tied to a specific university or region, but are working with more than 30 universities nationwide.

We transfer technologies developed by Japanese universities to companies around the world.

We work on behalf of the universities to license their studies and discoveries to industry. We support the commercialization process by marketing available technologies to potential licensees and partners and negotiating partnerships and licensing agreements.

* We receive remuneration only from universities, not from companies.
The party to the contract is a university, and we are not a right holder or a party to the contract.

We have received 4,700 new invention disclosures and have accomplished 580 license agreements

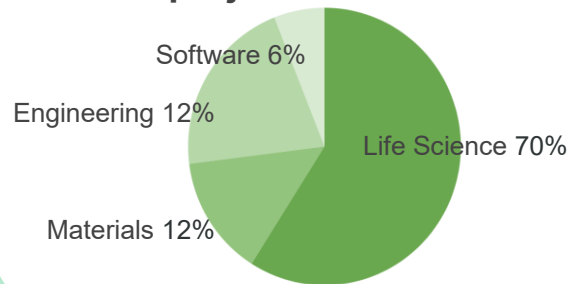

Technology transfer flow chart :

Invention Disclosure

Total 4,700 projects
(300/Year)
